

# Goodbye Datamax, and thank you! Hello Honeywell!

**Honeywell**  
THE POWER OF **CONNECTED**

**An exciting reseller announcement!**  
**Get ready for the transition from Datamax to the incredible Honeywell range.**

Honeywell has now announced the retirement of most of the long-serving Datamax range, including the E-Class, M-Class, I-Class and H-Class models. The A-Class print engine will remain available.

The replacement Honeywell models will offer your customers improved performance and technology.

Our team has been working closely with Honeywell and will offer extensive assistance, advice and information to ensure you are fully knowledgeable and up to speed regarding the entire model range.

- **Our fully trained technicians can help with all aspects of your transition. Got a question? Let us know, we can answer it!**
- **We have extensively trialed and tested each of the equivalent Honeywell printers to ensure they provide equal if not better performance over the retiring models.**
- **We can also assist with your own specific testing.**

## Datamax to Honeywell model transition

**E-Class**

**PC43**

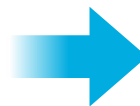

**M-Class**

**PM42**

**I-Class**

**PM43**

**H-Class 6"**

**PX6ie**

**H-Class 4"**

**PX4ie or  
PX940**
